

HIGH-PERFORMANCE, FLEXIBLE ARCHIVING OF DOCUMENTS

CENIT's IMPORTMANAGER allows you to archive documents in IBM Enterprise Content Management (ECM) systems, independently of the underlying platform. Its modular design ensures a flexible architecture: IMPORTMANAGER guarantees easy transfer of documents to IBM FileNet P8 or IBM Content Manager.

► PRODUCT FEATURES

- Import of documents, filling of values and security settings in the ECM target system
- Optional creation of folder structures in the ECM target system
- Optional creation of custom objects in the ECM target system
- Import control via an XML file
- Optional queue function following import
- Various modules for parsing incoming data
- Import of input data from file and/or database systems
- Modules for mapping index values and document classes
- Modules for transferring documents to the IBM ECM systems
- Needs-based integration of conversion modules
- Mapping of multiple parallel import scenarios
- Optional remote administration
- Customer-specific modules can be integrated

► CUSTOMER BENEFIT

- High flexibility and expandability due to modular design
- Implementation as Java services – thus, seamless integration in existing ECM systems, no additional hardware needed
- Modules for standard import sources (e.g. IBM ECM, database or file systems) included
- Simple remote and local administration
- Automated transfer of documents from existing systems for migration and systems consolidation
- Integration of existing individualized systems, e.g. for conciliation and completion of metadata
- Individualized parsers for integrating different or customer-specific data sources

► CUSTOMER SAMPLES
