

CATIA V5-INTEGRATED CREATION AND PRODUCTION OF GRAVURES

CENIT's CREATE GRAVURE software supports quick and intuitive creation of 3D gravures from texts or graphics within the CATIA V5 environment. The software can be used directly at an existing CATIA V5 standard workstation (as of R16) without an additional license, because deployment is covered by the basic MD2 or CAT+MCE licenses.

► PRODUCT FEATURES

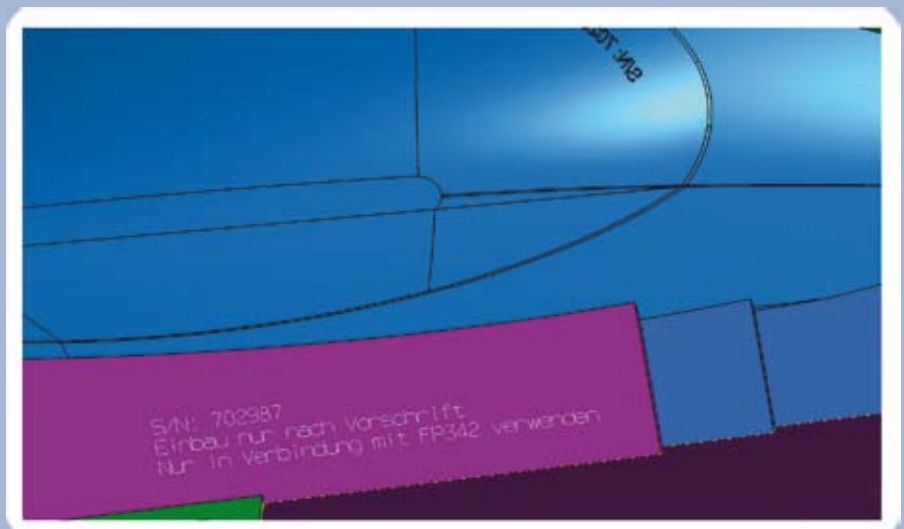

- Supports TrueType, OpenType and CATIA Stroke font types
- Offers customary text formatting options (left-justified, right-justified, centered) plus additional options for gravure justification (above, centered, or below the curve)
- Gravures can be rendered on curvilinear surfaces, along a curve, between two points, mirrored, side inverted or directionally inverted
- No separation into individual line segments during arc calculation
- High-precision arc calculation via creation of tangent-continuous splines
- adjustable curve precision
- 2D or 3D output
- Expansion options for logos, symbols and own fonts
- Direct transfer of contours to the NC environment for immediate use in gravure operations

► CUSTOMER BENEFIT

- Intuitive operation
- Easy-to-configure font selection
- Own logos, fonts and symbols can be integrated
- No additional licenses required
- In contrast to the conventional approach (via DXF), virtually no adverse effects on CATIA performance
- Associative linkage of characters makes it easy to move text to different positions on the curve

► KEY INDUSTRIES

- All manufacturing enterprises
