

FLEXIBLE ADMINISTRATION OF MODERN PLM APPLICATIONS

CENIT's software FLEXPLUS offers companies of the various industries and of all sizes an efficient start and systems administration framework for CATIA and DELMIA V5 installations.

► PRODUCT FEATURES

- A fully configurable surface allows the allocation of applications to individual users and groups
- Possibility to administer different settings – not possible in V5 standard software
- Independent from the platform
- Simultaneous handling of different licensing environments for different clients and client groups
- Administration and start of the different licences in a GUI and not through individual start icons
- An application launcher that enables a rapid and easy start
- An intelligent, easy to operate and to administer user rights management
- A structured definition of cascades in XML-format
- A free definition of code paths
- Copying of complete release definitions
- Allocation of environments and applications
- The possibility to use FLEXPLUS in UNIX and Windows
- Using FLEXplus, a range of other CAD and CAA applications can also be administered:
 - Pro/ENGINEER
 - UniGraphics
 - Qchecker
 - CADENAS
 - Tandem V5
 - CUT4AXES
 - FASTRIM

► CUSTOMER BENEFIT

- FLEXPLUS allows the various PDM systems, such as ENOVIA VPM, ENOVIA SmarTeam or SAP's PLM Integration für CATIA (CDI) to open CATIA models in a defined environment
- Data exchange tools and converting solutions have direct access to the defined CATIA environment through the FLEXPLUS_DXM interface – thus avoiding multiple administration
- Possibility to group CATIA licences according to locations and departments
- Easy PLM administration of various applications for small and big-size companies with multiple locations
- Efficient and secure management of complex IT structures
- Fast and easy configuration leads to higher productivity and a reduction of faults
- Available for Version 4 and 5
