

MANAGING MULTIPLE PLM APPLICATIONS WITH MAXIMUM FLEXIBILITY

Large and small companies in all types of industries face unique sets of IT complexities. CENIT's FLEXPLUS software has the best-in-class flexibility to answer just that challenge. FLEXPLUS provides an efficient single source desktop start point, allowing the user to choose their application and environment. This delivers the most optimal systems administration framework available for heterogeneous PLM implementations.

► PRODUCT FEATURES

- Supports the required range of multiple CAD, CAA applications with internal and external company environments such as:
 - CATIA V4 & V5
 - Q-Checker
 - Pro/ENGINEER
 - Siemens NX
- Fully configurable single source desktop interface independent from the platform
- Allocation of applications and their associated environments to individual users and groups
- Allocation of application configurations (eg MD2 vs HD2) to individual users and groups
- Grouping of application licenses according to groups, departments and/or locations
- For the administrator: a single point access for administration via a dedicated administrator interface
- For the user: an application launcher that enables a very rapid and easy start
- Support of multiple license management systems eg FLEXIm, LUM, etc.
- Intelligent, simple user rights management by application and OEM environment
- Open definition of codes and their paths
- Easy copying and editing of complete release definitions
- Simultaneous UNIX and Windows operation

- Access via leading PLM systems eg ENOVIA, TeamCenter, Windchill
- Easy access to data exchange tools and migration solutions

► CUSTOMER BENEFIT

- Easy
- Powerful
- Efficient
- Flexible
- Provides consistency and standardization
- Avoids errors in OEM project compliance
- Accelerates and enables implementation of full PLM capabilities
- Proven with 3,000 global customers and 10s of thousands of users.
 - Tandem V5
 - Parts Catalogs
 - CAA Applications in general
