

Systems- and Process Integration without limits

SAP Netweaver Process Integration is the state of the art integration technology and platform for Enterprise Application Integration (EAI). It allows the connection of SAP and non-SAP-systems offering a cross-border co-operation. Highest reliability is provided by process integration of all involved parties, such as employees, partners or customers. Offering an open and standardized platform SAP Netweaver Process Integration allows a flexible, efficient and economic integration of heterogeneous environments – independent from type of applications, business data & technologies. Through SAP Netweaver Process Integration, the right data and the right process information will be passed on to the right application at the right time.

CENIT Services

- Blueprint of your IT landscape
- Installation, configuration of SAP Netweaver® Process Integration and establishment of connections to backends (SAP and non-SAP)
- Installation and configuration of SAP® standard solutions such as SRM and CRM
- Redesign of business processes improving the flexibility of current investments and processes in order to gain the most value from a SAP Netweaver® Portal
- Providing the content, tailored to the exact needs of the different community members, by offering a personalized, intuitively useable web-based solution
- Integration of Application-to-Application (A2A), Business-to-Business (B2B) and Business Process Management (BPM) scenarios on a SAP Netweaver Process Integration.

Benefits

- Avoidence of bottlenecks in terms of cross-border communication and collaboration
- Harmonized collaboration within heterogeneous IT-environments
- Reliable communication & collaboration processes based on process integration
- Protection of investments by re-use of established processes, applications and objects
- Advanced process driven co-operation guarantees a high reliability and quality of cross-border collaboration/communication
- Standardization of business objects and process implementation enables high re-usability of integration modules
- Flexible integration of even heterogeneous environments in terms of applications, business data & technologies

CENIT Developments

- Customizing, development of customer specific adapters
- Customizing, development of customer specific processes
- Enhancements to SAP solutions by a variety of own add-ons (i.e. xAPPs)
- Development of own applications
